SECSCOPE CORP

SecScope Corp - Company Overview

COMPANY OVERVIEW | PUBLIC DOCUMENT | 2026

Company profile

SecScope Corp is a technology company focused on surveillance systems, embedded hardware, and physical security.

SecScope Corp specializes in innovation in the security systems industry. We are responsible for industry-defining standards in the electronic and technological fields.

Our work spans advanced surveillance platforms, purpose-built embedded hardware, network devices, and secure access products for consumers and organizations.

History

SecScope Corp began as a computer systems start-up that grew tired of artificially limiting technology to extend profit margins.

Our release of smaller, more efficient processors led to the creation of the term "SecuritySystems" and funded research across multiple industries.

Mission

Our mission is to advance society into an integrated world that is not separated by borders, restrictions, or currencies.

Products and services

- Surveillance systems
- Embedded systems
- Network devices
- Home security appliances
- Secure locks
